

Employees from Marathon Cheese Corporation sponsored the "Adopt a Classroom" project. Kindergarten students received books and took part in a gardening project. They talked about plants and were doing an activity to grow bean and pea plants. The students used a plastic glove and placed little seeds in each of the fingers of the gloves. They need to give the seed water and air, so they put a wet cotton ball in the fingers and hung the gloves in the window of the classroom. When the seeds sprout they will put the seedlings in cups of dirt provided by Marathon Cheese.

Thank you to the employees from  
**Marathon Cheese Corporation**  
for planting the seeds which will  
sprout ideas and help us grow.
