

Lake Ecology Class
Explored the ecological systems of Lake Minster and Lake Sunset and did water testing on ph and nitrate. Explored the water samples and looked at it under a microscope and found a snail. 🐌 We named it Sammy

Challenge Course with 8th Grade
Trying to get all left legs to move at the same time and then the right side to make the skis move forward like you are walking fast or skiing

Group Initiatives: The 5th graders learned some team building qualities, especially initiative. They had to silently, without any verbal communication, line themselves up in ABC order by middle name. They then were given pieces of pipe and attempted to get a marble from one end to the other without the marble stopping or falling to the ground. This was still a nonverbal communication task. (Below)

CWES

8th Grade Archery

Art in Nature

with 5th and 8th Grades

When outside and inspired by God's beauty in Lake Sunset students shared some inspiration

Bald Eagle Presentation
5th and 8th Grade

Thank you to Mrs.
McMeeken and Miss
Krautkramer for planning
this great trip!

Nice job, Bennett!

Compass and GPS Tracking

5th and 8th playing game

8th grade learning how to survive in the wilderness and make campfires with a flint

Everyone was successful in sparking the flint and the growing campfires

Bird Adaptations: The 5th graders learned about bird adaptations that help them survive.
