

*A visit from meteorologist,
JUSTIN LOEW
WAOW, Channel 9
peaks the curiosity of
our 5th graders*

Justin demonstrates what happens when you add high pressure to the environment. High pressure equals no clouds; low pressure makes for a cloudy day.

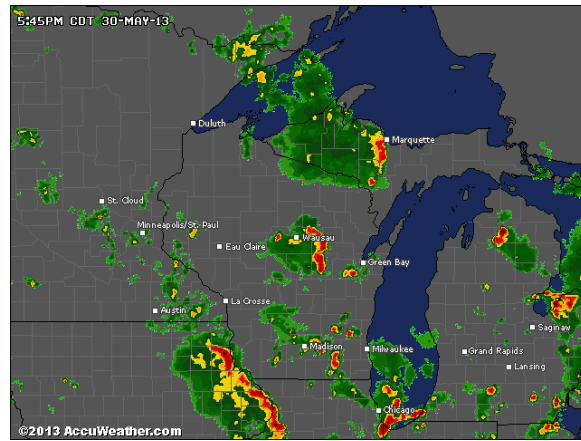

*Anemometer...
Measures wind speed*

*Just how windy
is Cayden?*

*Doppler Radar System helps Justin
to give us accurate forecasts.*

*Thank you, Justin Loew
for teaching us about the
weather and for sharing
your morning with us.*
